Patient to wear well fitted bra during measurement of Breast Support.

Design options

Bodysuit

Body Brief
(velcro)

Body Brief
(snaplock)

Postural Support
(many variations)

Uplif Panel

Pregnancy Panel

Open Crotch

Design choice definitions

Shoulder bracing: A diagonal pull to help extend the shoulders backwards and downwards to assist in improving posture as well as garment fit over the anterior chest wall.

Uplift panel: A 'v' shaped double layer of powernet extending from the middle of the abdomen to assist in supporting a pendulous abdomen.

Double abdominal panel: A double layer of powernet over the abdomen to provide increased abdominal support.

Soft abdominal panel: A section of satin lining across the abdomen for pregnancy.

Measuring tips

Neck circumference (1): Measured midway between the head and the shoulders.

Back neck drop: Measure from C7 to depth of scoop.

Front neck drop: Measure from sternal notch to depth of scoop.

Round neck: Standard design drop as determined by front/back neck drop measures.

Attached powernet turtleneck: Measure height from sternal notch.

Shoulder circumference (2 & 3): With patient standing with hand on hip, place tape measure on top of shoulder directly above axilla, and pass through under the arm. Then lower arm down and continue tape to shoulder.

Arm circumference: Using Purple JOBSKIN arm tape.

Chest circumference (4): Measured at the level of the axilla with arms placed down to the side.

Nipple line (5): For women please provide bra cup size. Circumference over nipple line should be measured with patient wearing a bra.

Side seam to side seam (19 & 20): A horizontal contoured measure originating directly below the midpoint of one axilla across the back to the midpoint under the other axilla (19) is positioned at the chest circumference (4), whilst (20) is positioned at the height of the waist.

Leg circumferences: Begin with the patient lying down, knee straight and leg supported in elevation. Proceed using an blue JOBSKIN leg tape.

Use Pink JOBSKIN tape for children - for arms and legs.
