

The LymphCrop Vest

www.jobskin.com

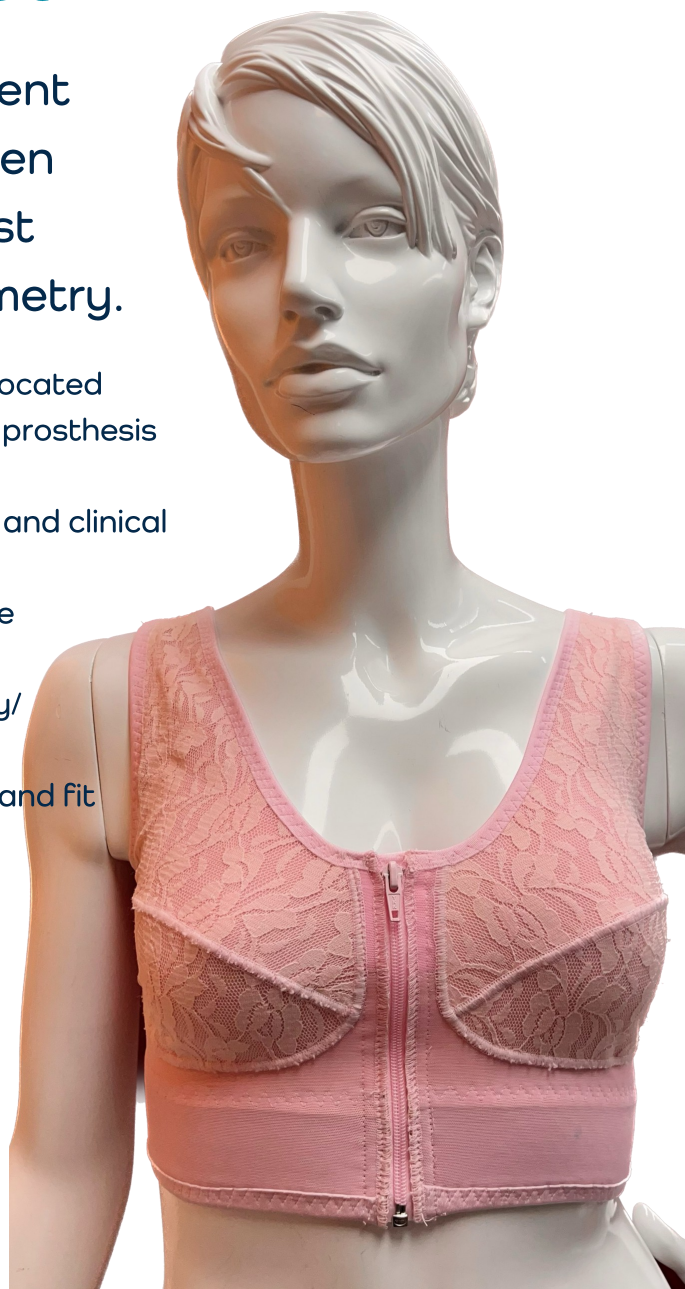

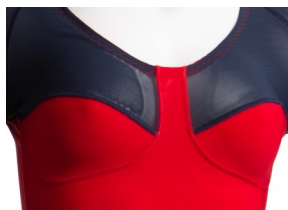

Introducing

The LymphCrop Vest

A unique and fully customised garment designed to meet the needs of women with chest wall oedema and/or breast Oedema and able to address asymmetry.

Custom options include differences in bra cup size, relocated seaming to support lymphatic drainage, inclusion of a prosthesis pouch, and attached arm sleeves

- Neckline height according to patient preference and clinical need
- Wide range of aesthetic options to aid adherence
- Wide shoulder 'straps'
- Able to accommodate marked breast asymmetry/ differences in breast size
- 5cm silicone-backed elastic to assist anchorage and fit
- Modifiable for men with chest wall oedema (pictured below)

Ordering Information

Individual patient measurements are required for the LymphCrop vest as the garment is custom-made (instructional videos at www.jobskin.com). Measurements are taken using a Jobskin retractable tape measure and body marker pen, and recorded on the LymphCrop vest measuring form. Information and resources can be found at www.jobskin.com.
